

IG-L emissions sticker

Information and requirement for the issue of multiple stickers:

Since January 1, 2015, all vehicles in class N in Vienna, Burgenland and eastern Lower Austria must be equipped with an emissions class identification sticker if they are registered as trucks or articulated vehicles.

The sticker can be obtained from the ÖAMTC under the following conditions and with the following documents:

- Please note that the sticker for trucks under 3.5 tons (N1 vehicles) must be affixed by ÖAMTC employees according to legal requirements. You must therefore come to the base with the vehicle.
- You can order the stickers by e-mail or purchase them directly at selected service points on site. (Please refer to the document to find out where you can purchase them).
- You do not need an appointment to purchase a sticker "on site" and the process only takes a few minutes. Please come with the vehicle documents (registration certificate or CEMT/ECMT document) to the base of your choice and present them to the ÖAMTC staff.
- For online purchase, send copies of the relevant vehicle documents (registration certificate or CEMT/ECMT document) by e-mail to r00560@oeamtc.at. Please make sure that the documents are clearly legible. If you order online, the ÖAMTC will send you an "open invoice", which must be paid in advance. The stickers are then ordered and dispatched by the club. (For an additional delivery fee of 20€ - 29€)

Due to the high demand, a processing time of at least 7 working days from settlement of the invoice must be taken into account.

- The cost per badge is € 39,-.

Further information:

If you have any further questions, please do not hesitate to contact the club:
